Education

University of California, Berkeley

Jun. 2020 – May 2023

Bachelor of Science in Electrical Engineering and Computer Science

Berkeley, CA

Relevant Coursework: Data Structures, Structure and Interpretation of Computer Programs, Cloud Computing and SaaS, Designing Information Devices and Systems I & II, Discrete Mathematics and Probability Theory, Machine Structures, Computer Security, Introduction to Artificial Intelligence, Operating Systems and System Programming, Computer Simulations with Jupyter Notebooks, Introduction to Database Systems, Introduction to Machine Learning

GPA: 3.512/4.0

Technical Skills

Languages: Python, Java, C, C++, HTML/CSS, JavaScript, SQL, Go

Technologies/Frameworks: React, NumPy, Flask, Django, MongoDB, PostgreSQL, Kubernetes, Helm, Terraform

Experience

Conectado

August 2025 - Present

Lead Engineer, Learning and Platform Systems

San Jose, CA

- Lead planning of company-wide software architecture, aligning the company's long-term technical vision throughout all teams and eliminating redundant work.
- Developed curriculum and taught AI literacy bootcamps to 50+ students, equipping them with the knowledge and tools required to adapt to modern AI advancements.
- Lead the technical design and implementation of the AI Opportunity Backpack, giving bootcampers access to personalized opportunities and a tight-knit community.
- Established the development priorities for the Conectadoverse, a metaverse platform giving bootcampers an immersive learning experience.
- Created and maintained a self-hosted installation of Canvas LMS, enabling bootcampers to participate asynchronously and eliminating 50% of instructor time.
- Created and maintained a self-hosted installation of n8n, reducing employee workloads through AI-enhanced workflows.

Hewlett Packard Enterprise

June 2023 - July 2025

Cloud Developer

San Jose, CA

- Developed a network automation service in Go that simplifies network switch setup and management for Private Cloud Business Edition (PCBE).
- Implemented unit, functional, end-to-end, and contract testing using Go to eliminate bugs for various microservices within PCBE.
- Collaborated with local and international teams to unify understanding of service requirements and prevent work duplication, improving development efficiency for dependent applications.
- Designed and led the creation of Terraform as a Service, a Go application that streamlines the Terraform deployment process for internal developers by automating 60% of deployment stages.

Projects

AI Opportunity Backpack (aibackpack.conectado.com) | Next.js, Firebase

- Led 3 teams of software developers building a student-focused platform that discovers academic and career opportunities tailored to each bootcamper's goals.
- Designed and implemented the core application, connecting students to scholarships, jobs, and community resources.

Personal Homelab | Kubernetes, Terraform, Ansible, Proxmox, TrueNAS, Prometheus, Grafana

- Provisioned a production-parity cluster across 4 mini PCs with Terraform and Ansible, with a dedicated TrueNAS server for persistent storage.
- Self-host production-grade services including n8n for workflow automation, and Prometheus and Grafana for monitoring and alerting.
